

WebPresent!

WebPresent! is an on-demand archived presentation solution delivered over the Internet with audio, video and slideshow.

For a fraction of the cost of traditional meetings, you can deliver training and company presentations online and on demand, viewable by a browser from anywhere in the world.

WebPresent! is easy. You don't have to be an expert at anything except delivering your message – we take care of the rest. We capture the audio and or video, take your slides and presentation material and combine them into a presentation that can be viewed over the internet by anyone – anytime – anywhere.

- **Training and Education.** Record your training sessions and have them available for later viewing from anywhere – anytime. No special equipment is required.
- **Sales and Marketing.** Provide product training and demonstrations for customers and prospects to see and hear about you and your services.
- **Professional Development.** You can archive seminars and presentations for later viewing by your members who couldn't make it to the meeting.

WebPresent! uses a standard web browser. By clicking on a link on your website or on an email a person can see and hear your presentations, sales and marketing information or pre-recorded seminar.

WebPresent! is cost effective. A small once-off fee gives you a professional presentation with unlimited downloads for 12 months. Your presentations, seminars and events can be watched over and over again.

WebPresent! is simple and requires virtually no effort on your part as we do everything for you.

How it works

We capture the audio from your meeting or presentation using a speakerphone via a telephone line. Video is optional and recorded via the web or ISDN. You will also need to provide the presentation slides and photos (if you are not using video).

We then synchronise the slides with the audio (and video if provided) and host on our secure, high capacity internet site. A link to access the presentation is provided to you, which you can email to participants, or post on your website.

Turnaround is usually within 24 hours with unlimited replays for up to 12 months or even longer.
